

## Summer 2025 Assignments – Incoming Geometry Honors Class

Dear Students,

I hope you're enjoying a well-deserved break after a busy school year. While summer is a great time to relax and recharge, it's also a valuable opportunity to prepare for one of the most important academic milestones ahead: the **PSAT** and **PreACT**.

SAT/ACT scores help colleges assess how prepared students are for college-level reading, writing, and math. A strong score is not only crucial for college admissions, but it can also open the door to scholarships and other exciting opportunities. **Early and consistent preparation can make a big difference.**

Summer is the perfect time to study at your own pace, free from the daily demands of school. Becoming familiar with test formats and question types reduces anxiety, boosts performance, and builds confidence. Both exams are timed, so practicing under similar conditions helps you develop the ability to work efficiently, an essential skill in both academic and professional settings.

These tests also emphasize logical reasoning and problem-solving, which are vital for success in college-level coursework. The math sections in particular reinforce core concepts you have already learned. Reviewing them now helps strengthen your foundation for future learning. Additionally, staying mentally active over the summer helps you avoid the “summer slide” and return to school academically strong. Even just **30 minutes a day** reviewing math concepts or working through practice questions can add up to **real progress by the end of the summer**.

Enjoy your summer, and happy studying!

**To access your Albert Summer Assignment**, you have two options:

**Check your school email and accept the invitation** I sent you today. – Just click the link in the email to join the class directly.

OR follow these steps:

1. Go to **<https://www.albert.io>**
2. Log in using your school email and password. (If you're new to Albert, you may need to create an account using your school email.)
3. Click “Join a Class” and enter the class code: **28TJ6JND4X69Q**
4. Once you're in, look for the Summer Assignment under the “Assignments” tab.

### **NOTE:**

The due dates are simply there to give you a suggested timeline and help you pace yourself over the summer. You are free to complete the assignments in any order that works best for you. For example, you might choose to start with the assignments that contain easy questions, then move on to the assignments with moderate questions, and finish with the ones with difficult questions.

Use the approach that helps you stay motivated and makes the most sense for your learning style!
